### Important Note

- › This material is provided strictly for informational purposes only and is not to be used or considered as an offer, an invitation to offer or solicitation to buy, sell or subscribe for any investment products. Investment involves risk. Past performance is not indicative of future results. Before making any investment decision to invest in the Fund, investors should read the offering documents and especially the risk factors therein.
- › Pictet-Emerging Markets High Dividend (the "Fund") will invest mainly in shares and similar securities of companies (including ADRs and GDRs) whose headquarters are located in and/or that conduct their main activity in emerging countries and for which it is expected that dividends are higher or greater than those of their reference market (represented by the MSCI Emerging Markets Index).
- › The Fund may have exposure to emerging markets including but not limited to China. Due to the political and economic situations in emerging countries, investment in the Fund presents, among others, greater legal, political, social, economic policy, volatility, currency, exchange, tax, capital repatriation and liquidity risks.
- › The Fund may be more susceptible to any single economic, political or regulatory event than a diversified fund, because a relatively higher percentage of the Fund's assets may be invested in the securities of a limited number of issuers and/or geographic zones.
- › Dividend is not guaranteed. The Fund aims to pay dividend annually. Dividends payable (if any) from dy distribution shares may be paid out of the capital. Investors should note that the payment of dividends out of capital represents a return or withdrawal of part of the amount they originally invested and/or any capital gains attributable to the original investment. Besides, distributions, including distributions involving the payment of dividends out of the Fund's capital, may result in an immediate reduction in the NAV per distribution share.

<sup>2</sup> Dividend is not guaranteed. Dividends may reduce the Fund's net asset value

<sup>3</sup> Please note that positive annualized dividend rate does not imply a positive return

<sup>4</sup> "Net distributable income" means the net investment income (i.e. dividend income and interest income net of fees and expenses) attributable to the relevant share class and may also include net realized gains. % of dividend paid out of net distributable income for the year = net distributable income for the financial year concerned / dividend payable for the year
